EXPERIENCE

Via (Ebix Technologies) — Software Development Engineer **Jul 2024 – Present**
Noida, India

- Resolved **100+** production defects, improving system stability by **15%** and reducing recurring incidents.
- Reduced API latency by **25%** and error rates by **20%** through query and request optimization.
- Integrated multiple external APIs (HotelBeds, Paximum, DST) with reliable and fault-tolerant handling.
- Improved booking workflows, reducing data inconsistencies and ensuring transaction reliability.

CDAC — Intern **Feb 2024 – Jun 2024**
Noida, India

- Improved OCR accuracy on degraded Hindi documents by fine-tuning **Tesseract OCR**.
- Built preprocessing pipelines for noise reduction, normalisation, and image enhancement.
- Prepared labelled datasets for YOLO-based detection for signature verification, enabling automated document validation.

Tech Access Learning Pvt. Ltd. — Trainee **May 2021 – Jun 2021**
Laxmi Nagar, India

- Developed backend modules using **Django** to handle product, user, and transaction workflows.
- Implemented RESTful APIs for product and order management, supporting core e-commerce operations.

PROJECTS

Pet Care and Aid — Flutter, Firebase, Google Maps API, Razorpay **Project Link**

- Built a cross-platform pet care marketplace enabling location-based service discovery, booking, and payments.
- Implemented real-time scheduling and scalable Firestore data models for users, services, and transactions.
- Integrated Google Maps for proximity-based search and multi-gateway payments (Razorpay, UPI).
- Developed authentication, reviews, and notification systems to improve user engagement.

Bizzare Online Store — Python, Django, HTML, JavaScript **Project Link**

- Built a full-stack e-commerce platform supporting product catalog, cart, and checkout workflows using **Django**.
- Implemented backend logic and database interactions using **Django ORM**, ensuring consistent transaction handling.
- Designed relational data models for users, products, and orders, enabling efficient query execution
- Built backend APIs for product management and order processing using Django.

Text Wizard — React.js, JavaScript, HTML, CSS **Project Link**

- Built a React-based text processing app supporting real-time transformations (trim, case conversion).
- Used functional components and React Hooks for efficient state management and UI updates.

TECHNICAL SKILLS

Languages: Java (8+), Python, JavaScript
Backend: Spring Boot, Spring MVC, Spring JDBC, REST APIs
Database: PostgreSQL, MySQL
Frontend: React.js, HTML, CSS
Tools: Git, Postman

EDUCATION

Center for Advanced Computing Development (GGSIPU) — MCA (CGPA - 7.8) **2022 – 2024**
Delhi, India

SGTBIMIT (GGSIPU) — BCA (CGPA - 8.5) **2019 – 2022**
Delhi, India
